

MALVERNE PUBLIC SCHOOLS

DISTRICT GOALS – 2022-23

1. Provide resources to support high expectations for exceeding New York State standards for mastery learning outcomes for all students, through engaged teaching and learning practices, a guaranteed and relevant curriculum, and utilizing cutting edge technology.
2. Provide resources to prepare students for successful post high school pathways.
3. Provide resources for professional development to enable staff to engage students from all backgrounds, cultures, and abilities in meaningful ways and support all learners to reach their academic and social emotional potential.
4. Provide a safe and culturally responsive environment to support a robust social emotional learning program that is trauma focused, with access to the needed resources to promote mental wellness for staff and students.
5. Provide increased opportunities for personal growth and development for students to enhance civic awareness and engagement, helping them to emerge as more confident, altruistic, well-rounded citizens and active, contributing members of society.
6. Maintain the district's financial position through adherence to a long-range plan that includes a sustained reduction of the annual appropriated fund balance, a feasibility study for exploring long term needs for a growing enrollment, the replenishment of necessary reserve funds, and the strategic development of annual New York State tax cap compliant budgets that provide for all essential and required resources to support successful student trajectories.
7. Continue to improve proactive communications with members of the greater community to inform them of district initiatives and events, and to promulgate the ongoing accomplishments of our school district; to generate effective interaction with community stakeholders through print, digital, social media, and interpersonal information.
